| **Data & automation** | MySQL · SQLite · Firebase · Firestore · Playwright · APScheduler |
| **IT systems** | Windows · BSD · PC assembly · Server configuration · Remote access · Troubleshooting |
| **Development tools** | Claude Code · Google Antigravity · Google Stitch |

## PERSONAL PROJECTS

### Game Systems & Server Tools

C++ · Lua · Python · MySQL

Modified gameplay and quest systems, built supporting scripts, and configured and troubleshot game servers.

### Classified Ads & Marketing Platform

PHP · MySQL · JavaScript · HTML/CSS

Built a database-backed listings platform with filtering, automated publishing, RSS feeds and SEO-friendly URLs.

### Job Tracker & Telegram Bot

Python · Playwright · SQLite · APScheduler

Automated listing collection, scheduled checks and Telegram alerts; designed a companion web interface.

### Fuuk'Up — Mobile App

React Native · Expo · TypeScript · Firebase

Developing onboarding, sign-in and profile verification flows for a mobile dating application.

### Pingu — Travel & Savings App

React · TypeScript · HTML/CSS · localStorage

Developing travel budget estimates, interactive savings milestones and locally stored progress tracking.

### Lab Escape — Browser Game

JavaScript · HTML/CSS · Web Audio API · localStorage

Built a browser chemistry game with randomized matches, timed scoring, sound effects and saved high scores.

## EDUCATION

### Mehmet Akif Ersoy University

Computer Programming · Undergraduate Coursework · 2019–2021

### Harun Şenözüar Mesleki ve Teknik Anadolu Lisesi

Database Programming · High School Diploma · 2019
